

FunTime (DJ Park, Zixin Zhang, Qing Liu, Simon Acevedo Rodriguez)

User Stories:

1. Before a user logs in, the homepage will display a button that will then route them to log into their Google Calendar. This homepage will also contain information/pictures about what the site does and what the functionalities include
2. When a user logs in for the first time, they will be presented with a questionnaire regarding their interests and hobbies. This will serve as the framework for the type of information that is recommended to them. If a user does not enter the correct password, the log in will display a google calendar login error.
3. When a user is logged in, their google calendar will be displayed on a week-based frame, the starting date is the current date.
4. After the user logged in, clicking the button on the top right corner named "Profile" will shows all the profile info of the user including profile image, first name, last name, email, and id.
5. After the user logged in, Recommendation list on the right of the web will generate a list of events based on the user's preference. Each page of recommendation list shows 3 events, by clicking the button "Next Page" will go to the next page for recommended events. By clicking "Prev Page", it will return to the previous list of recommended events. Note that "Prev Page" is disabled when the user is in the first page. Each recommended event is displayed like a card, with information of event image, event title, event time and event summary. If the user want to add the event to their calendar, simply click on "Add to Schedule" and the page will be automatically refreshed and the event will be added to the calendar (also for google calendar).
6. Search function is at the top of the website. User can type in keywords they are interested in for the events and then click "Submit" button to check for the searched results. 20 searched results are displayed in a pop up page, "Add to Schedule" function is also available for the searched events.
